BESENCONI UNIT CONTROL 

WHITE VERSION

## Download Besenzoni Control Device

from the APP Store

With **BUC** Besenzoni Unit Control you can use your smartphone to manage the handling of hydraulic combined ladder/gangway Besenzoni installed on board through bluetooth technology.

It takes two simple steps:

**1** Download the App - **Besenzoni Control Device** from the Appstore and check if the App is compatible with the device's operating system: IOS10.0 or later / Android 8.0 or later

**2** Purchase **BUC - Besenzoni Unit Control (receiver/adaptor Bluetooth)**

To identify which bluetooth receiver/adaptor is compatible with the combined ladder/gangway being used it is essential to provide some information:

- State the combined ladder/gangway serial number indicated in a plaque under the ladder.
- If possible state the circuit board Code:  
eg. C608SB these codes correspond to the **7FF99619 WHITE VERSION** interface for combined ladder/gangway  
eg. RSP this acronym corresponds to the **7FF99618 BLACK VERSION** for combined ladder/gangway.

## INSTRUCTIONS FOR INSTALLATION AND USE

### Important information:

*Before positioning, installing and commissioning the device, read this instruction manual carefully as it contains important information on assembly, safety and use.*

**Do not change or tamper with any part of the device.**

**Improper use could harm people and/or objects.**

*Besenzoni S.p.A. cannot be held responsible for damages caused by failure to follow these instructions. Keep these user instructions safe and pass them on to any future users.*

**Only a specialised technician may install the **BUC** Besenzoni Unit Control** contained in this box. You may find it useful to check the "Assistance and Resellers" section in the Besenzoni Control Device App, which includes a map of our official Service points that you can contact.

### In questa scatola sono contenuti:

- A** 1 **BUC - Besenzoni Unit Control.**  
Bluetooth Receiver / Adaptor **code 7FF99619**  
to be used with up to 8 smartphones/devices.
- B** 1 connector cable for the **4 button** control panel  
to control the combined LADDER/GANGWAY

BUC WHITE VERSION COD. 7FF99619 COMBINED  
LADDER/GANGWAY MODELS SP 602 / SP 607 / SP 608

*The instructions for installation and use in Italian and English are available on:  
[www.besenzoni.it/landing/buc](http://www.besenzoni.it/landing/buc)*

## INSTALLATION PROCEDURE

- Remove the power source from the system that controls the combined LADDER/GANGWAY.
- Install the **BUC** receiver/adaptor far away from heat sources and electromagnetic disturbances.
- Disconnect the cable connected to the control panel from the electronic junction box **fig. C** and connect it directly to the **BUC** **fig. A**.
- Take the connector **fig. B**, connect it first to the **BUC** and then to the control panel socket inside the electronic control unit **fig. D**.
- Take note of the password on the label attached to the front of the **BUC**.
- Power the **BUC** circuit board with the electronic junction box line stabilised at 12/24 volts
- Restore power to the system.

**ADD ONE MORE BUC BUC:** If you want to add the management of a second device (eg to move both the Besenzoni combined ladder/gangway and passerelle) you can do this simply by entering the drop-down menu in the settings section and clicking on “add new device”; select the device corresponding to the name indicated on the label of the 2nd **BUC**

**RESET FUNCTION:** You can reset all the devices stored through the “Reset device” function in the settings menu.

### PROCEDURE FOR RESETTING MEMORIZED DEVICES:

- 1) Open the lid of the **BUC** by removing the 4 screws
- 2) Press the **S1** button indicated in the image for 2 seconds until the **blue LED** goes out
- 3) Close the receiver cover.

**S1**  
**Led blu**

## AND ACTIVATION PROCEDURE

- Activate the device's Bluetooth and activate localization in case of problems in the research of the **BUC**.
- Open the **App** on your device.
- Click Settings from the dropdown menu in the top left-hand corner.
- Choose and set an unlock code which you will also use in the future.
- Deactivate the Demo mode and tick “Start in Command View”.
- Click “Set Device Code” and insert the **5 digit security code** shown on the **BUC** label
- Click “Select device” and select the device that corresponds to the name shown on the **BUC** label: e.g. Name: Besenzoni1006
- Click the Dropdown menu button.
- Click Command and then the screen to start the **App**.
- The commands to control the combined ladder/gangway will appear in the next screen.
- In order to correctly control the combined ladder/gangway, you must press and hold the selected command, otherwise an Error message will show up on the device's screen. To restart the controlling operation, press and hold the command again.

### NOTE

Settings: by selecting Launch Commands when you next open the App, once you have inserted your unlock code, you will have immediate access to the commands section. Controlling the ladder/gangway via the App still allows you to use the remote control that you have been supplied with.
