

3D Bend Silicone Neon Strip

Product Images

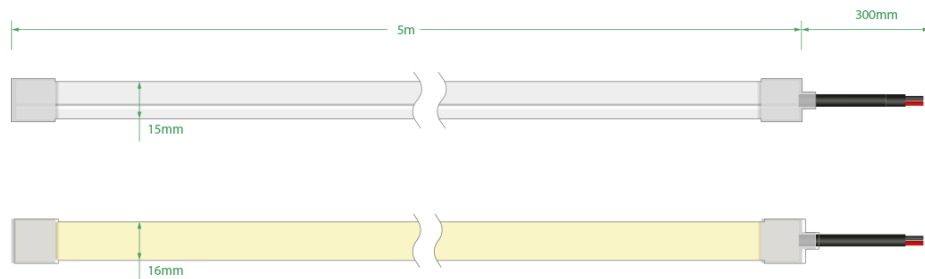

Short Description

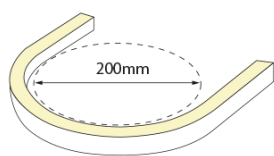

3D Bend neon flex allows flexibility in all directions, that is both side and top. This linear light offers a solution to clients who need to follow multiple axes of curve in a single length of light.

- High light transmittance, environmental protection grade silicone material and intergrated extrusion moulding process
- Unique optical light distribution, uniform lighting surface with no shadow
- IP67 protection level, salt resistance
- Simple and stylish appearance
- Available in white ranging from 2100k to 6000k
- Available in red, green, blue, amber and pink (minimum order quantities apply)
- 24V, available in 5W and 10W
