

Tolomeo Mini Custom Track Light

Product Images

Short Description

A tailor-made track lighting solution for a wide variety of applications. *Tolomeo Mini* can be customised in terms of length, finish and lighting elements in order to aesthetically compliment any interior space as well as provide the correct lighting levels.

The basis of the product is an anodised aluminium extrusion which can be produced in any desired length up

to 2 metres. Various lighting modules are then available to install in the track which are available in numerous colour temperatures.

Multiple fixing methods can be used with *Tolomeo Mini* including surface mounting and recessed solutions.

Tolomeo Mini keeps to the marine-grade philosophy of all of our products and is suitable for use on yachts and in coastal locations.

Description

Components

Aluminium Track

The core element to the Tolomeo track light is the aluminium extrusion into which all the other elements fit. This is made from anodised aluminium and can be finished in any RAL colour (minimum order quantities may apply). Standard finishes are matt black RAL 9005 20% gloss and matt white RAL 9010 20% gloss. The track can be installed in either a recessed or surface mounted fashion.
