Bluetooth Remote Switch

Product Images

Short Description

Sentry™ provides a new interface between boat owner and their craft. This brand brings innovation to the world of device and system control on board.Sentry™ Remote Switch is an engineered Bluetooth switching solution.

A downloaded App controls a waterproof 8 x 10Amp switch module that can remotely switch most electrical circuits on board. Common applications include lighting, electric and electro-hydraulic products, regardless of brand.

Description

Sentry™ Remote Switch is an innovative piece of hardware designed to simplify life onboard. Up to 8 devices on board can be connected into the switch relays and controlled via Bluetooth using a simple app interface. The switches can be customised quickly and easily, changing the switch type to either on/off, momentary or timed, as well as the switch label. Using a stable Bluetooth connection, the devices on board can be operated remotely and by multiple users.

Lighting

The Sentry™ Remote Switch can be used to control lighting circuits on board. Imagine the scenario of wanting to board your boat from the jetty at night. It would be ideal to be able to switch on a few courtesy lights from the pontoon to help you board safely. With Sentry™ you can. Open the app, and turn on and off your connected lights with a single tap or perhaps use the timer switch feature to ensure they automatically switch off after a chosen length of time.

Automation

Electrical systems such as TV rise and fall devices or other automatic moving components can be connected to Sentry™ Remote Switch. In the app settings, rename the switch feature to suit the application and choose a momentary switch type for push and hold operation. Leave multiple traditional remote controls behind and pull everything into the Sentry™ app.

Flexible Control

Electric table pedestals are a perfect candidate for Sentry™ control. Give everyone on board control of these devices and remove the need for integrating physical switches into your interior layouts. Sentry™ Remote Switch provides a reliable Bluetooth connection that can be accessed anywhere on board.

Boarding with Ease

Radio or infra-red remote controls are the typical method to operate boarding equipment such as gangways. With Sentry™, these can be a thing of the past. Provide your guests on board with access to the device so that everyone can operate the gangway from their Bluetooth eneabled device. No more passing around the remote!

Additional Information

Finish	ABS Plastic
Colour	White
Length (mm)	220.00
Height (mm)	85.00
Width (mm)	145.00
No. of Relays	8
Input Voltage	9 - 27 Vdc
Breaker Size	8 x 10A
IP Rating	IP65
Connectivity	Bluetooth
Input Type	Deutsch®
