

# BS Series - Ceiling Flip Down TV Lift

## Product Images

## Short Description

---

Change the way you think about the location of your TV with the Sea & Symphony BS Series. This series of television mechanisms allows the TV to be installed inside your ceiling, table, floor or structure without having to sacrifice valuable wall space.

Their range of mechanisms include:

- BS ID - opens from the ceiling at 90°
- BS TS - opens from the ceiling at 90° and rotates 180°
- BS Yo-Yo - opens from the ceiling at 90° and lowers
- BS TS Yo-Yo - opens at 90°, rotates 180° and lowers
- BS Table - for installation on tables or worksurfaces, opens at 90°

## Description

---

## BS ID

The BS ID opens at 90° from your ceiling, the flip-down mechanisms allow you to utilise a space that is usually unusable without sacrificing walls or surfaces.

---

## BS TS

The BS TS opens at 90° from the ceiling and can be rotated 180°, perfect for areas where you have multiple viewing positions. All rotating models include a safety device that prevent movement if the TV is in an improper position.

---

# BS Yo-Yo and BS TS Yo-Yo

The BS Yo-Yo opens at 90° and can be lowered. This is good for ceilings that are particularly high, where additional lowering is needed to bring the screen to a suitable height.

The same mechanism is also available in a rotating version, the BS TS Yo-Yo, this version lowers at 90° and can rotate up to 180°, perfect for areas with multiple viewing areas.

---

## BS Table

Combining practicality and design, the BS Table can be installed in tables and work surfaces and opens at 90° and can rotate 180°.
