Excl. Tax: £0.21

Product Images

Short Description

Silicone end cap for use with our [Ultra-high Temperature LED Strip](#). This simple end cap is designed to be applied to each end of the LED strip (cable and non-cable end).

This end cap should be used in conjunction with a clear silicone adhesive. Simply cover the cut end of the of LED strip with silicone adhesive and slip over the end cap. Wipe away any excess adhesive and allow to set for the time suggested by the adhesive manufacturer. When using in a high temperature environment be sure to check the adhesive is suitable. Adhesive and cable not supplied.
