- Anodised aluminium steering wheel in a matte black finish
- Black leather grip
- Hand stitched detail

- Ø350 diameter

## Description

---

The 'Sinel' wheel is a contemporary wheel with a 'T' spoke design that fits well in any helm. 'Sinel' is made from anodised aluminium and is designed to withstand the harsh marine environment. As standard it is supplied with a black leather grip. It is our recommendation that leather wheels are installed internally.

The Gussi range of wheels come as standard with a 3/4" tapered key way fitting which is a very common wheel specification and should fit the majority of steering shafts. On request we are able to supply with a splined shaft (longer lead times may apply). We are able to adapt and change the finish to suit your requirements but please note that sometimes we do need a minimum order quantity to be able to make certain changes.

## Black Anodised Aluminum
