Short Description

The 'Malera' Gussi steering wheel is a contemporary and elegant design that fits well in any helm. 'Malera' is made from anodised aluminium and is designed to withstand the harsh marine environment. As standard this wheel is supplied with a black polyurethane grip which features added detail around the spokes for a high end look and feel.

- Anodised aluminium steering wheel with polyurethane grip
- Universal fit

- Ø350 diameter

Description

The 'Malera' Gussi steering wheel is a contemporary and elegant design that fits well in any helm. 'Malera' is made from anodised aluminium and is designed to withstand the harsh marine environment. As standard this wheel is supplied with a black polyurethane grip which features added detail around the spokes for a high end look and feel.

The Gussi range of wheels come as standard with a 3/4" tapered key way fitting which is a very common wheel specification and should fit the majority of steering shafts. On request we are able to supply with a splined shaft (longer lead times may apply). We are able to adapt and change the finish to suit your requirements but please note that sometimes we do need a minimum order quantity to be able to make certain changes.

Brushed Anodised Aluminium

Elegant Tri-spoke Design

Black Polyurethane Grip
