- Moulded polypropylene steering wheel with polyurethane grip

- Universal fit
- Ø350 diameter

Description

The '013' is a contemporary moulded polypropylene wheel with a polyurethane grip that represents excellent value for money. The construction of the wheel means that it is perfect for use in harsh environment installations such as open RIBS and works etc.

The Gussi range of wheels come as standard with a 3/4" tapered key way fitting which is a very common wheel specification and should fit the majority of steering shafts. On request we are able to supply with a splined shaft (longer lead times may apply). We are able to adapt and change the finish to suit your requirements but please note that sometimes we do need a minimum order quantity to be able to make certain changes.
