## **Short Description**

The *Duck* electric horn is an excellent value stainless steel horn. Available in a 12Vdc version only, the *Duck* horn is designed for small craft which require a powerful signalling device. The neat housing design completely hides the power cable from view and the compact 250mm length ensures that this horn can be easily and discretely positioned.

The *Duck* horn contains the same Marco DNA and excellent build quality as the larger models in the range. It offers an excellent electric horn solution at an attractive price.
