## Product Images

## Short Description

### Telescopic Under-platform Ladder in Watertight Box

Telescopic bathing ladder in a watertight box for boats and RIBs, made from mirror-polished AISI 316L stainless steel. The under-platform frame includes a locking lid that automatically locks the ladder in the closed position beneath the platform, preventing accidental opening while sailing. Our 2370 letterbox swim ladder features 3 or 4 steps made of oval stainless steel, with grey or brown non-slip treads and a choice of 4 widths.

All steps have water-draining holes and welded stainless steel side caps. Upon request, a version with a pull handle on the front plate is also available.
