Short Description

'Amalfi' is a contemporary take on the classic director's chair. Its elegant structure is made from injection moulded polyamide, strengthened by 316-grade stainless-steel inserts, embedded within the chairs frame.

This chair is available in two colours as standard (anthracite and dove grey) and in white on request. Each chair has a Batyline back rest and seat base and the combination of this and the polyamide structure makes this an all-weather resistant solution.

'Amalfi' is simply folded by releasing four pins on the seat base. When folded, the seat is only 14cm wide and can remain standing independently. The chair has silicone grips on the base to prevent marking on teak decking.
