

Flexible LED Wall Washing Strip - 10° Lens

Product Images

Short Description

Innovative LED strip with 10° lens for far reaching wall grazing effects. This product is designed to illuminate tall structures and surfaces with a focused, anti-glare light output. It is the perfect product for architectural application, highlighting a building's features, or can equally be used in a marine application for mast illumination or similar.

- IP67 rated casing with injection moulded connectors and end caps or various IP65 DIY options
- 10° beam output with near 80 lux at 10 metre distance
- Available in 2700°K, 3000°K or 4000°K
- Cuttable every 150mm
- Constant voltage strip type
- 3 year warranty
- Dimmable
- Top view bend direction
- Can be custom made to order in specified lengths with silicone moulded end caps

Description

The Profile

This wall washing flexible LED strip is the perfect solution for dramatic structure illumination in both an interior and exterior environment. The IP67 rating of the product means that it can be installed in wet locations and is suitable for exterior use. The product is entirely resistant to dust ingress and offers a high

level of durability against solvents, saltwater and UV light.

This innovative product is compact at only 20mm x 10mm in section and 150mm between cutting points. It is supplied either on a 10 metre reel with injection moulded end cap and cable connector or it can be supplied prepared to custom lengths. The 10 metre reels can be cut and prepared on site, finished with an IP65 DIY connector or end cap. Various accessories are available to aid installation.
