Short Description

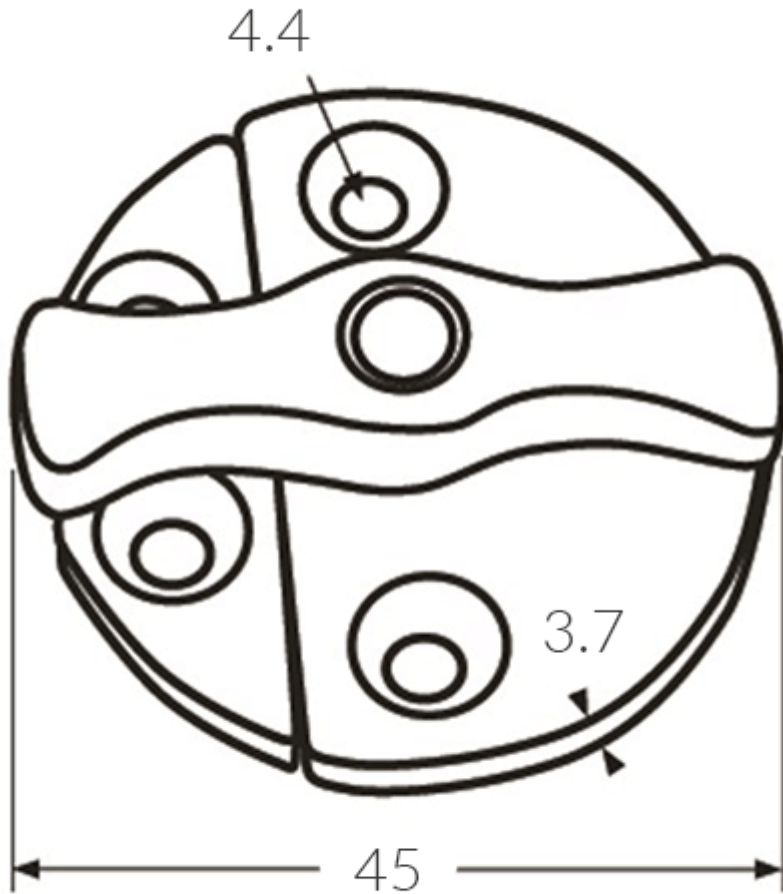

A 316-grade stainless steel lever latch with a 45mm diameter.

This simple latch has a rotating lever that can be positioned against the striker plate in order to secure a door, drawer or other opening panel. Being made from 316-grade stainless steel, the product is suitable for interior or exterior use and is highly resistant to corrosion.

Fixings are not included but can be purchased separately; please visit the related products section below. 4x 4.2mm (No.8) countersunk screws are required to install this item.
