

Knurled Stainless Steel Footrest For 4S Seat Pedestal Height Booster

£101.18

Excl. Tax: £84.32

Product Images

Short Description

A stainless steel footrest with knurled finished. This footrest is designed to be used in conjunction with the SCS-PEDA-F 250.BLK seat height boosting spacer. It helps to offer constant foot support when in seated position. The correct alignment of the legs and back is essential in order to get the best possible protection from the suspension system, and feet should always be slightly braced.

The bar is finished with a knurled texture in order to provide the best possible grip.

Fixings for the assembly of the footrest to the base are not supplied (M8 x 8mm)
