Short Description

Self-priming automatic electric pump with helical PTFE gears, integrated check valve and electronic control.

Nickel-plated brass body and stainless steel shaft. Main applications: fresh water pressure systems and shower kits on boats, rubber dinghies, sailing boats and campers.

This pump features Marco's *Intelligent Brain* ECU system. The pump is able to detect the constant pressure in the plumbing system and respond accordingly when the pressure drops caused by an outlet being used. The means that the pump can respond to demand and only ever works at the appropriate speed for any given usage. Advantages of this system include:

- Quieter running - pump rarely needs to run at full speed
- Longer lasting - a more mechanically sympathetic arrangement
- Less consumption
- No need for accumulator/expansion tank*
- Patented flange eliminates condensation build-up in motor housing and extends motor life
- Intelligent programming and inclusion with digital switching systems
- Fault finding - ECU logs error codes and allows for faster diagnostics

* Please consult our technical department if intending to install this pump without an accumulator tank. There are some scenarios in which an accumulator tank will still be required.

Additional Information

Input Voltage	12 / 24Vdc
Flow Rate	10 l/min
Pressure	2 bar
Liquid Type	Fresh water
Power Consumption	3 / 1.5 Amps
Motor Power	90W
Fuse	7.5 Amps
Hose Connection	12mm
Ports (BSP)	3/8"
Weight (kg)	1.403000
Manufacturer	Marco
