Short Description

A chrome click-clack sink waste for use with sinks without overflow.

This sink pop-up waste is operated by pushing down on the waste lid and is sometimes referred to as a "click-

clack" waste. The waste is secured in place with the supplied nut, clamping the sink between the two parts. The waste has a 1 1/4" BSP connection.

The sink waste is a brass construction with a chrome plated finish. Other finishes available on request.
