

DP9/E 12/24V Deck Washing Pump With Electronic Control - 4.5 Bar

£364.26

Excl. Tax: £303.55

Product Images

Short Description

Complete kits including an electronic self-priming electric pump with electronic control. Equipped with helical PTFE gears, in-line filter, nickel plated brass body and non-return valve. With 15 m stretchable hose and jet

gun, equipped with quick-click connection, stop-jet, check valve and trigger with jet regulation. The kit are particularly suitable for washing operations either with salt or fresh water.

This pump features Marco's *Intelligent Brain* ECU system. The pump is able to detect the constant pressure in the plumbing system and respond accordingly when the pressure drops caused by an outlet being used. This means that the pump can respond to demand and only ever works at the appropriate speed for any given usage. Advantages of this system include:

- Quieter running - pump rarely needs to run at full speed
- Longer lasting - a more mechanically sympathetic arrangement
- Less consumption
- No need for accumulator/expansion tank*
- Intelligent programming and inclusion with digital switching systems
- Fault finding - ECU logs error codes and allows for faster diagnostics

Now featuring the Marco 'Integrated Flange' which seals the motor for extended life of the brushes and lowering of electrical consumption.

* Please consult our technical department if intending to install this pump without an accumulator tank. There are some scenarios in which an accumulator tank will still be required.

Additional Information

Input Voltage	12 / 24Vdc
Flow Rate	12 l/min
Pressure	4.5 bar
Liquid Type	Water + liquid chemicals
Power Consumption	12 Amps
Motor Power	180W
Fuse	15 Amps
Hose Connection	13mm
Weight (kg)	5.040000
Manufacturer	Marco
