Short Description

Brass hose fittings with 3/8" BSP thread & O-ring.

This R-KIT from Marco consists of 2x nickel plated brass hose fittings with a male 3/8" BSP thread. The hosetail fittings are for Ø13mm hose (internal diameter). They feature a VITON 2056 O-ring to prevent any fluid leaks once tightened. The kit also includes an adaptor piece with 3/8" BSP male thread and VITON 2056 seals, useful if looking to add an in-line filter to a pump system.

These fittings are compatible with any Marco or other brand pumps featuring a 3/8" BSP port.
