

Quick Lock Removable Stanchion

Product Images

Short Description

A carbon fibre removable stanchion system in different diameters and lengths.

The Quick Lock removable stanchion system is a high-quality and lightweight temporary stanchion product. Making use of the Quick Lock bases in Q32 and Q52 sizes (sold separately), the stanchions feature a corresponding male plug which simply docks into the base socket and can be released using the button mechanism located on the side of the plug. The stanchions are available in 630mm or 1000mm length for the

Q32 model or 1000mm for the Q52.

Accessories such as rope and affiliated parts and storage bags are also available for clients looking to source a complete package. We encourage those looking for such a service to contact us in order to obtain a quotation.

Description

Quick Lock deck socket system allows for the fast insertion and removal of the stanchion system.

A Ø45mm stanchion pole is available for the Q32 base. This is a 1000mm tall pole
