

Bayonet Removable Stanchion

Product Images

Short Description

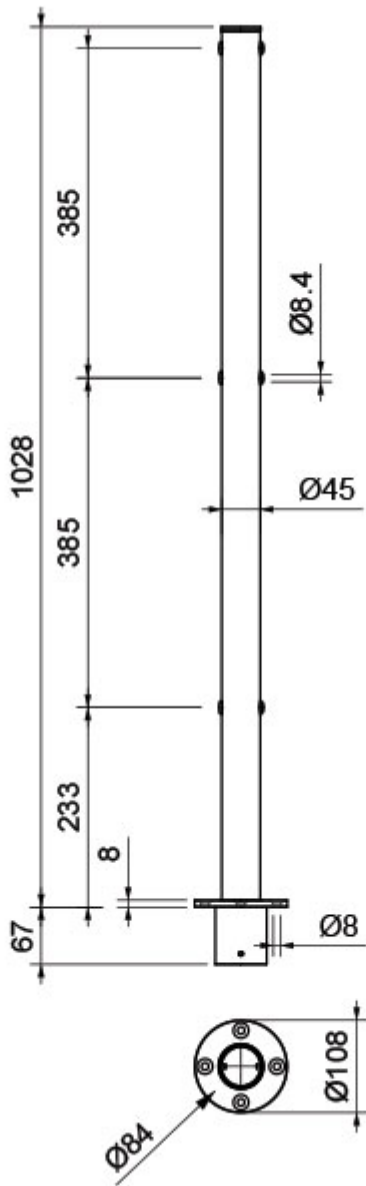

A carbon fibre removable stanchion system in different diameters and lengths.

The removable stanchion uses a simple bayonet type fitting to securely engage and disengage the stanchion pole. Made from pre-preg autoclaved carbon fibre and CNC machined 316-grade stainless steel, the product is produced to the best quality standard.

The product is available with Ø45mm or Ø66mm diameter stanchion poles with a standard height of 1000mm.

Description

Product Drawing & Specification

Ø45 stanchion pole system

Additional Information
