

SP 610 Bathing Ladder

Product Images

Short Description

Automatic Bathing Ladder with Gangway Function

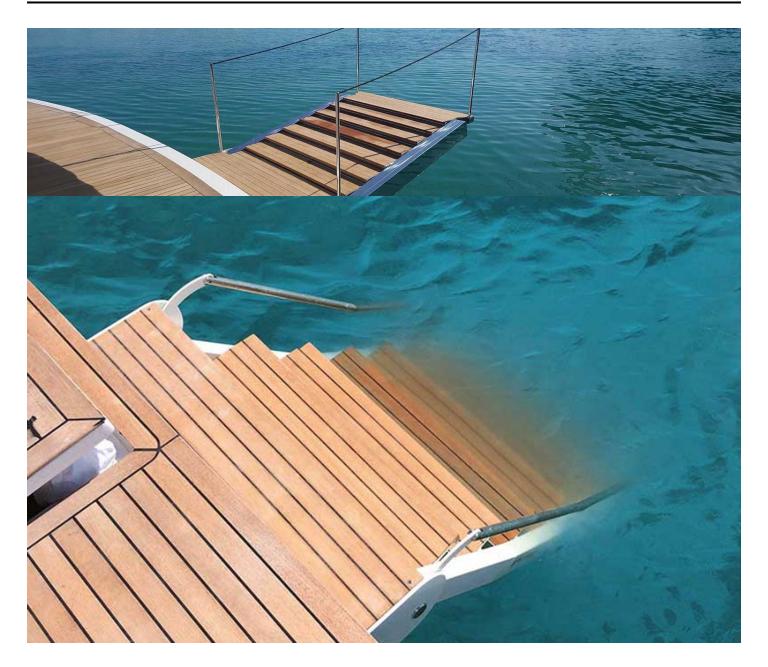

By adjusting the angle of the steps, the SP 610 multifunctional automatic retractable ladder can transform into a walkway in just a few seconds. This ladder adapts to the various technical and aesthetic requirements of the boat on which it is installed, always using top-quality materials. It comes supplied with removable manual stanchions with rope.

The ladder features an automatic multifunction design combined with a gangway function, making it suitable

for both side and stern installation. It can be tilted upward or downward while keeping the steps level and has a double tubular structure made of polished or powder-coated stainless steel, complete with polished or painted covers. With 5+1 self-levelling steps made of synthetic teak, the ladder has a downward inclination of 48° and an upward inclination of 48°.

Additional features include manual removable stanchions with a rope handrail, an aluminium housing box that collects cleaning and washing water (though it is not watertight), and a touchpad panel remote control for operation from the cockpit, combined with an electro-hydraulic control unit.

Description

Besenzoni: Luxury Ladders for Yachts and Superyachts

Besenzoni are renowned for producing high-end products, including their range of ladders designed for yachts and superyachts. Their ladders are crafted from premium materials such as stainless steel, carbon

fibre, and teak, ensuring exceptional durability and reliability. The range includes bathing and boarding ladders in various configurations, from manual drop-in models and electric options to fully automated hydraulic letterbox designs.

Hybrid Function

Ladders with a hybrid function, serving as both bathing ladders and gangways, effectively combine the features of a gangway and a ramp. The ladder can be swiftly transformed into a gangway by adjusting the step inclination, extension, and height. This model has been designed to ensure a safe walkway on steep inclines and to facilitate access to the quay. Customisation options for this type of product are extensive and essential. The technical specifications, including size, tilt, rotation, and finish, can be modified to meet the specific requirements of the shipyard, owner, or designer, allowing for a blend of various technical and aesthetic preferences.
