

LP300 Ladder and Platform

Product Images

Short Description

Hydraulic Platform with Tender Lift Function

The LP 300 from the Oceano range is an advanced version of the LP 100 PLUS ladder/platform, designed for versatility, enabling multiple activities in a single product. Primarily functioning as a bathing or boarding

ladder, it also acts as a tender handling platform, capable of safely lifting water toys and tenders up to 400 kg.

The ladder/platform uses a hydraulic lift and lower mechanism, allowing it to accommodate docks with significant height variations from the water level. Handrails on either side ensure safe passage, while the spacious platform can double as a comfortable sunbathing area. The LP 300 features a powder-coated steel frame with solid teak footboards and black caulking (or an option without wood panelling). It offers a wide surface to facilitate the handling of jet skis and tenders or to be used as a beach area. An optional dedicated and prewired electro-hydraulic control unit is available.

The product is custom-made to match the size and specifications of the boat.

Description

Besenzoni: Luxury Ladders for Yachts and Superyachts

Besenzoni are renowned for producing high-end products, including their range of ladders designed for

yachts and superyachts. Their ladders are crafted from premium materials such as stainless steel, carbon fibre, and teak, ensuring exceptional durability and reliability. The range includes bathing and boarding ladders in various configurations, from manual drop-in models and electric options to fully automated hydraulic letterbox designs.

Hybrid Function

Ladders with a hybrid function, serving as both bathing ladders and gangways, effectively combine the features of a gangway and a ramp. The ladder can be swiftly transformed into a gangway by adjusting the step inclination, extension, and height. This model has been designed to ensure a safe walkway on steep inclines and to facilitate access to the quay. Customisation options for this type of product are extensive and essential. The technical specifications, including size, tilt, rotation, and finish, can be modified to meet the specific requirements of the shipyard, owner, or designer, allowing for a blend of various technical and aesthetic preferences.

Additional Information

Operation Type	Hydraulic
Weight (kg)	0.000000
