## Product Images

## Short Description

---

### **A lightweight and quickly removable boarding handle with anti-rotation design.**

Designed for luxury yachts and tenders, this ergonomic plug-in handle provides secure, confident boarding and disembarking. Its innovative keyway socket design prevents rotation, ensuring a stable grip that enhances user safety and confidence.

Crafted from premium carbon fibre, the handle delivers exceptional strength while remaining remarkably

lightweight. The high-gloss finish reflects the superior craftsmanship expected on high-end vessels, creating an impressive first impression that matches your yacht's luxury standards.

**The handle is designed to be used in conjunction with its socket. Please view the corresponding socket in the related products section.**

Lead time is approximately 3 working days.
