Short Description

Thrill Vortex 'Wood' glass chiller

Thrill Wood blends artisanal craftsmanship with high-performance chilling. Handcrafted in Italy using multilayer wood veneer and oak interiors, it's ideal for elegant residential or boutique hospitality settings.

- Natural wood finishes: ash, walnut, wenge
- Oak interior with antibacterial properties
- Marine-grade protective coating
- Stainless steel accents
- Standard or ERT CO₂ fitting options
- Rechargeable battery & anti-freeze system

Please note that CO₂ is not supplied with Thrill Glass Chillers. The tank must be of the dip tube (syphon tube) type. The standard bottle connection provided is BS 341 No. 8, commonly used in the UK and EU. There is a lead time of 10-14 days from date of order.

Description

Timeless Craft, Modern Edge

Thrill Wood brings together the precision of master Italian artisans and the needs of today's most discerning interior designers. Its multilayer natural wood shell, marine-grade protection, and antibacterial oak core create a piece that's as durable as it is elegant, offered in three refined wood finishes paired with satin stainless steel for a striking, contemporary look.

Precision Cooling for Perfect Cocktails

Make perfect cocktails and offer your customers a unique experience with Thrill International products. In just seconds, these Italian-made glass chillers eliminate 88% of bacteria from glass surfaces—removing odours and aftertastes that compromise drink quality. By instantly chilling glasses to -40°C / -4°F , they reduce ice usage and eliminate the need for chilled glass storage, delivering undiluted drinks with flair. Whether you're running a cocktail bar, hotel, wine lounge or catering event, Thrill chillers elevate every serve with hygiene, speed and style.

Flexible CO2 Placement: Up to 12m Away

Thrill glass chillers come with standard hoses—2.50m for the Tap and 2.80m for F1 Pro, Cube, SBI, and Wood models. For added flexibility, our exclusive E.R.T. (Extended Tube Range) lets you position the CO₂ tank up to 12 metres away—perfect for custom furniture or dedicated storage rooms. Available in 8m and 12m lengths, ERT hoses maintain flawless performance without compromising your ice glass experience.
