Short Description

A spring-loaded stainless steel lifting ring with electropolished finish.

This stainless steel lifting ring is an excellent solution for those needing a practical and flush handle. Commonly used for in-ground lockers and lids, the lifting ring is set into the installation surface for a flush finish. The spring-loaded handle always returns to its parked position within the body of the product ensuring that no elements of the handle stick up or cause a trip hazard.

The handle is secured in place by 4x countersunk 3.5mm No.6 screws which can be purchased separately; please view the related products section below.
