Short Description

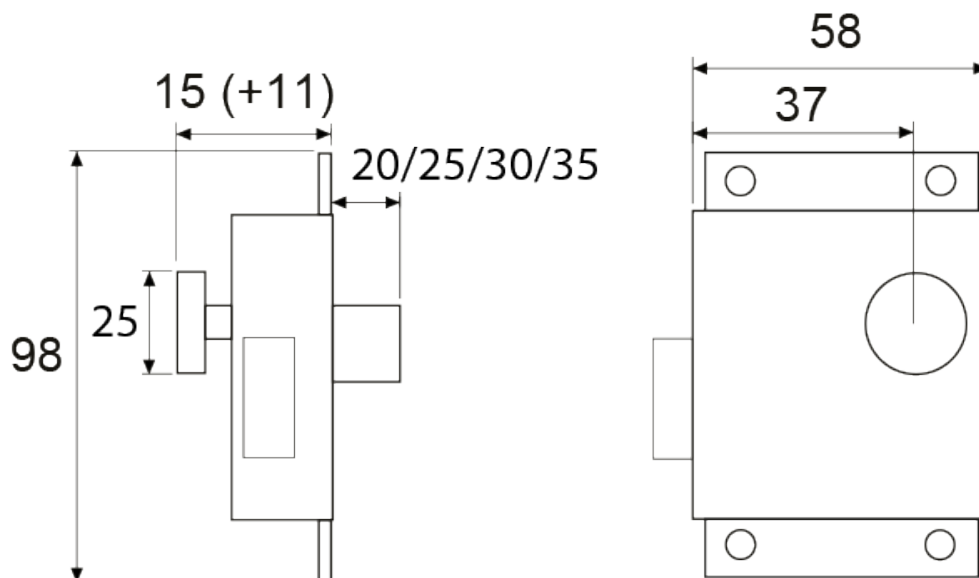

A marine-grade rim door latch with a Euro style cylinder and a spring loaded stainless steel lifting ring. This door latch is ideal for use as a door, washboard or hatch lock and can also be used where a certain level security is needed thanks to the incorporation of the Euro cylinder. The product features the same lock

mechanism as the *art.3656* but in addition is supplied with a stainless steel lifting ring for installation on the opposite side of the door to the lock.

This product is available in a chrome plated finish only and is supplied complete with a matching striker plate. The spring loaded lifting ring is constructed from 304 grade stainless steel. The latch has a universal door handing design and can simply be inverted for left or right handed doors.

- Rim door lock with Euro style cylinder barrel
- Marine-grade construction
- Available with various length cylinders from 20mm to 35mm
- Supplied with two keys and spring loaded lifting ring
