Short Description

Single electromagnetic horn with stainless steel trumpet, bracket and membrane. The *EMX2* is an excellent high tone electric horn constructed entirely from stainless steel. It is the perfect small craft horn solution and with an impressive 119 decibels output it packs a punch. The *EMX2* can be paired with the *EMX1* long stainless steel horn for a twin, dual tone horn set-up.

The *EMX2* features a new support design with integrated power cable.

Complete with fixing hardware. NMMA type approval.
