Short Description

Double electromagnetic horn set with stainless steel trumpets, brackets and membranes. The *EMX1/2* is an excellent dual tone electric horn set constructed entirely from stainless steel. It is the perfect small craft horn solution and with an impressive 122 decibels output it packs a punch. The *EMX1/2* marine horn set consists of the *EMX1* long stainless steel horn and the *EMX2* short stainless steel horn. Together, the two tones come together for a unique sound.

The *EMX1/2* features a new support design with integrated power cable.

Complete with fixing hardware. NMMA type approval.
