Short Description

Waterproof electronic horn with 316-grade stainless steel bracket and electronic ECU.

This electronic horn system comprises of a manually activated tone with a maximum continuous blast of 5 seconds. In addition, the horn has an inbuilt 90 second fog signal function which overrides any other function when activated. An auxiliary input is also included so other devices can be connected.

The EMH complies with the EN 60945 2002-10 directive regarding the testing of maritime navigation and radio communication.
