Short Description

This is a multi-functional dimming device for use with both halogen and LED luminaires.

The 6018 dimmer can operate on both 12 or 24Vdc and is designed to be used in conjunction with either a single or double pole dimming switch. This means that if used with a single pole dimming switch you can switch the lights on/off or dim the light intensity. A double pole switch set-up will allow for one touch to increase the intensity and one touch to dim the intensity.

- 12 or 24Vdc
- LED or halogen application
- Ideal for a variety of dimming styles (single pole or double pole switching)

Description

SMD LED

12Vdc - max. 150W

24Vdc - max. 300W

Power LED

12Vdc - max. 60W

24Vdc - max. 120W

Halogen

12Vdc - max. 90W

24Vdc - max. 180W

Additional Information

Weight (kg)	0.120000
Manufacturer	Foresti & Suardi
Wattage	Max. 300W
Input Voltage	12 / 24Vdc
IP Rating	IP20
Dimmer	Yes
