## Product Images

Galvanised brushed brass finish pictured. Standard is chrome plated

## Short Description

The Volans range of adjustable spotlights is an important group of products within our lighting range. The surface mounted design of the fittings combined with the ability to adjust the direction of output make them perfect luminaires in an anti-glare lighting plan. No recess depth is required to fit the products which also means that they can be installed in areas where there is no space above headlinings or ceiling panels.

The Volans 70 fitting is not only suitable for use as a spotlight but can also double up as a reading light.

As standard the fitting is supplied in a chrome plated finish. The item is photographed here in a galvanised brushed brass finish which is available on request and may be subject to a minimum order quantity.

- Adjustable surface mounted spotlight
- 56° lens offers a medium light pattern
- Chrome plated finish standard (brush galvanised brass photographed- special order)
- 10-30Vdc input
- Dimmable
