Short Description

A solid brass cupboard latch, available in either a polished brass or chromed brass finish.

This small rectangular cupboard latch is manufactured using pressure die casting and is available in a natural brass (unlacquered) or chrome plated finish. The latch has a simple lever which can be actioned with a finger, then allowing the latch body to be used as a handle. The neat flush design is of classic nautical origin but the latch looks the part on both yacht and land-based joinery. Being made from solid brass, the product is

suitable for interior or exterior use.

The latch is supplied with its corresponding striker plate in a matching finish.

Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this cupboard latch are amongst the core products manufactured since those early days. The tooling may have been updated and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.
