Short Description

This E14 LED Tower lamp is compatible with our low voltage E14 fittings. Operating on 10-30Vdc, the tower lamp produces a warm white output at around 3000°K. This particular tower LED lamp has the added feature of a frosted lens, meaning that the LED circuit board is neatly hidden from view. This is particularly desirable for use in a table lamp where it is possible to see the lighting element from above.
