Short Description

A chrome plated brass shower door lock with cast 316-grade stainless steel handles. This particular shower door lock set is supplied with the *Sans Souci* softened rectangular handles (available separately). The gentle return of the handle towards the door makes this set ideal for small space application, softening the protrusion of the handle. This product has been specially designed for glass door installation.

The lock set is suitable for glass door thicknesses of up to 10mm. Set supplied complete with anti rattle lock, striker plate and handles. Keep can be easily adjusted for left or right handed use.
