Short Description

Pressure die cast brass toggle fastener. Available in either a polished brass or chromed brass finish.

Used to secure a door, locker or storage box, this pressure die cast toggle fastener features a latching counter plate designed to be installed on the same plane as the latch. 4x No.6 3.5mm countersunk screws are required for the installation of the product which are available to purchase separately; please view the related products below (316-grade stainless steel only). The toggle fastener is available in either a polished unlaquered brass or a chrome plated brass finish.

Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this toggle fastener are amongst the core products manufactured since those early days. The tooling may have been updated and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.

Description

Heritage Collection

Our Heritage Collection features fittings that have been in our catalogue of hardware since the beginning of our brand back in 1978. The parts are typically pressure die cast brass and can be supplied in a polished, unlacquered finish or with a chrome plating. These parts are iconic pieces of 'deck jewellery', made famous by the 1960's and 70's timber craft and commonly used on modern interpretations of such boats.
