Black leather

Short Description

Solid brass push button latch with hand stitched leather loop in various finishes.

This mechanism is a beautiful positive latching solution for a wide variety of interior design projects. Ideal for use in transport environments, the push button latch is best suited to yacht, automotive and aeronautical applications where cupboards need to be held securely closed to avoid opening when underway. The latch is compatible with soft close hinges and drawer runners*.

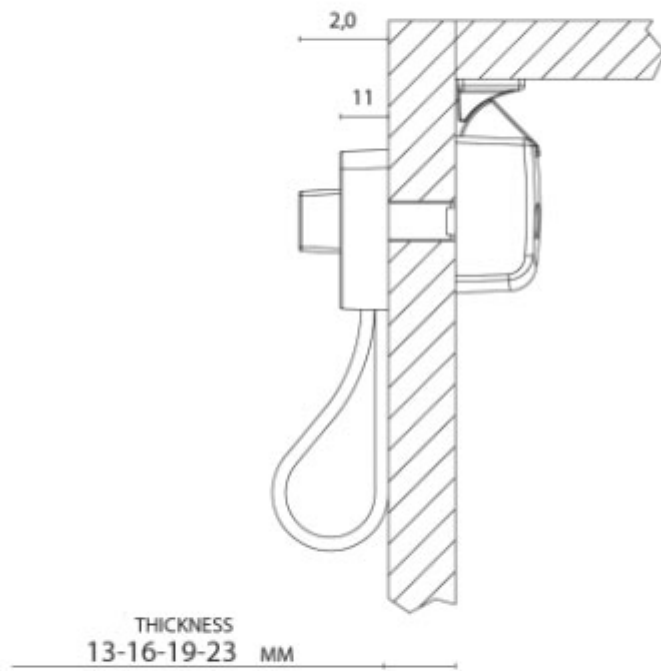

The latch body can be rotated according to the desired latching direction.

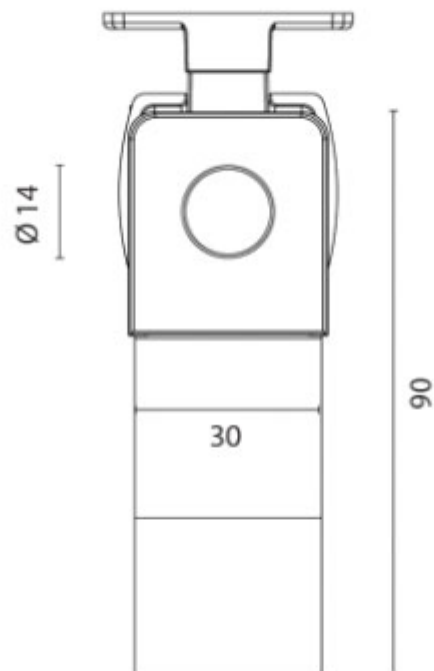

Available in chromed brass with a choice of four leathers. Other finishes available on request, a minimum order quantity may apply.

*Tests carried out with Blum mechanisms
