

Hatch Locking Device - Stainless Steel - Compression

£140.22

Excl. Tax: £116.85

Product Images

Short Description

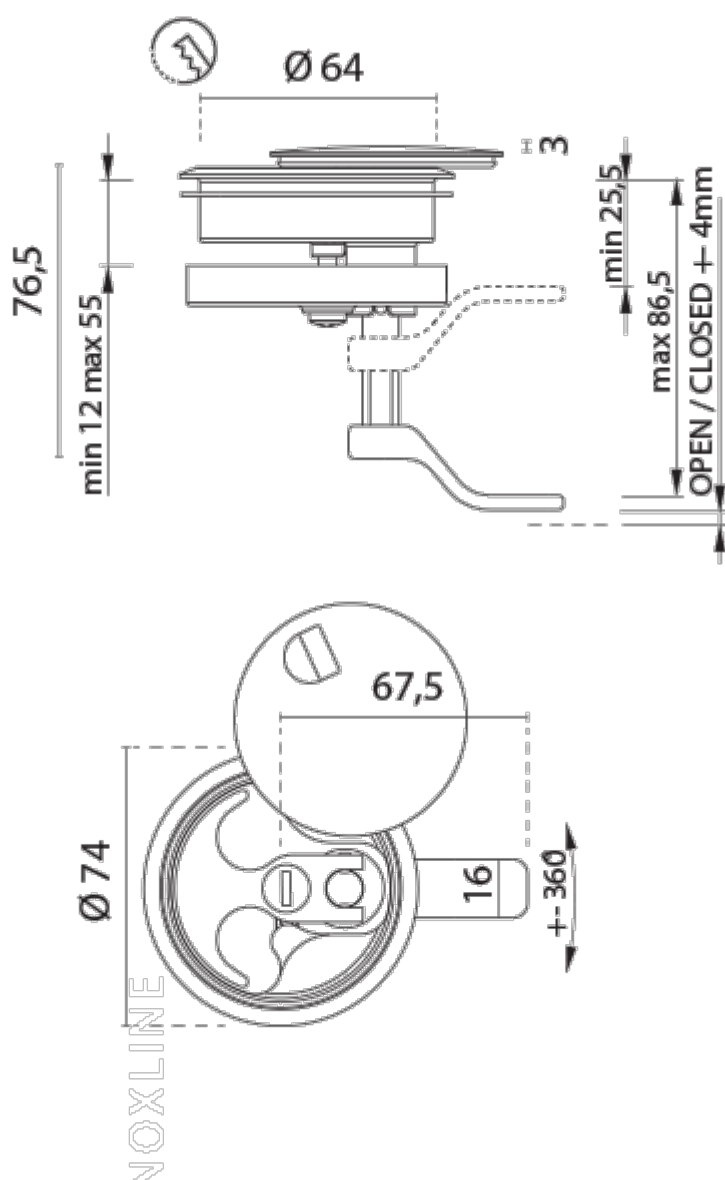

A 316 grade stainless steel hatch locking device. Simply close the hatch and turn the handle to secure the opening lid. A cylinder key lock provides a low security deterrent to those wishing to gain unauthorised

access to the hatch. A small lever simply blocks the handle from being lifted, therefore stopping the latch from being operated.

The product is made entirely from 316 grade stainless steel and comes complete with a counter plate and two keys. This product features a swivel lid which can be closed to protect the device from a build-up of dirt and salt residue.

The product features an off centre cam system in order to apply a 4mm compression when securing.
