

DMX-PWM CV DECODER FOR LED LIGHTING INC. RGB/RGBW, 12-24VDC

£160.85

Excl. Tax: £134.04

Product Images

Short Description

This 4 channel DMX controller is ideal for use with our RGBW LED strip lighting. It must be used in conjunction with an appropriate power supply (if used in mains voltage application) and DMX controller. The product can also be used with RGB, bi-colour or single colour products.

This particular DMX controller can handle up to 6 Amps per output with a total maximum current of 24 Amps.

DMX allows for the full control over colour and intensity.

- Excellent method to control RGBW lighting such as our RGBW strip LED
- Compatible with a large range of DMX controllers
- PWM constant voltage output

Additional Information

| | |
|----------------------------------|---|
| Weight (kg) | 0.430000 |
| Manufacturer | Ltech |
| Wattage | Max. 576W |
| Input Voltage | 5-24Vdc |
| IP Rating | IP20 |
| Operating Temperature Range (°C) | -30 ~ 65°C |
| Dimmer | Yes |
| EMC Standards | EPA3050B:1996, EN1122B:2001, EPA3052:1996, EPA3060A:1996, EPA7196A:1992, EPA3540C:1996, EPA8270D:2007 |
