

Nappa Air - Breathable Techno-leather

Product Images

Short Description

“NAPPA AIR®” is a coated fabric made of a compound of different raw materials, skilfully mixed and processed in order to produce a unique upholstery material, soft, pleasant to the touch and sight, easily workable and above all BREATHABLE.

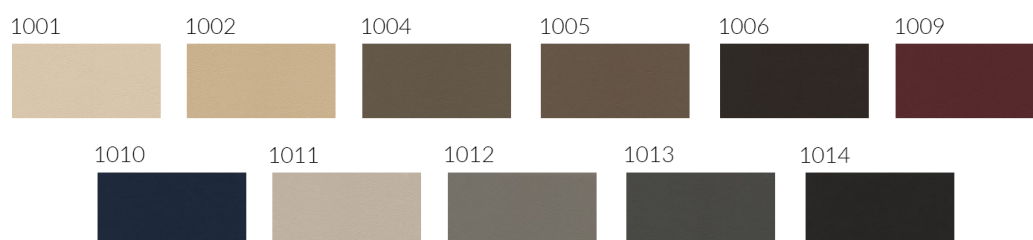

Unlike normal synthetic products, made with PVC or polyurethane, and real leather, “NAPPA AIR” features an “open pore” structure, which limits the accumulation of heat and humidity, giving the user maximum comfort, especially on armchairs and sofas.

Designed to be used in the automotive sector, on high-speed trains, for high-end office chairs and for customers who do not want to use real leather, NAPPA AIR can be utilised successfully by yacht, home and hotel owners who want an innovative product that can represent a valid alternative to real leather and that can be appreciated for its quality and comfort.

- Soft texture, genuine alternative to leather
- Phthalate-free
- Good hydrolysis resistance
- Solvent-free PU components
- Good abrasion resistance
- Fire-retardant

Description

Colour Chart

- Slight colour difference between different batches are possible. Italvipla and Timage reserve the right to update the colour range and to improve the technical properties of the product without notice.
- Special colours require a minimum of 500 metres
- **CLEANING INSTRUCTIONS** : Clean with mild soap and tepid water then rinse gently. Never use solvents, alcohol, steam cleaners, bleaches or aggressive detergents.
