Short Description

Compact oil change electronic systems for fixed boat installations. Conceived for oil fill and drain operations for all on-board uses like generators, engines, transmissions and gangways. Their electronic control adjusts the speed of the pump according to oil viscosity/temperature and increases its speed during priming. The system automatically shuts off in case of empty tank, short circuit and after 30 minutes of operation. OCS

systems are neat and tidy, avoiding leaking and mess whilst being simple to operate.
