Short Description

The SW-931 is a beautifully made steering wheel for interior or exterior application and is particularly suited to open craft and RIBs.

- Anodised aluminium steering wheel with polyurethane grip
- Stainless steel centre cap with etched 'Gussi' logo
- Different colours and finishes available from stock
- Universal fit
- Ø350 diameter

Description

The 931 Gussi steering wheel is a beautiful addition to any helm. Made from anodised aluminium, the wheel is not only gorgeous to look at but is designed to withstand the harsh marine environment. The Gussi range of wheels comes as standard with a 3/4" tapered key way fitting which is a very common wheel specification and should fit the majority of steering shafts. On request we are able to supply with a splined shaft (longer lead time may apply).
