- Polished stainless steel steering wheel
- Available upholstered with black leather or with a black polyurethane grip
- Universal fit - 3/4" tapered keyway
- 350mm Diameter

Description

The Model 011 Gussi steering wheel adds a serious touch of quality to a helm. Made from cast 316 grade stainless steel, this steering wheel has a weight and scale befitting of a high-end vessel. The mirror polished stainless steel together with the simple black grip combine to create a beautiful item that is also very durable against the harsh marine environment. The 011 is available in two versions, black leather with a stainless steel central disc engraved with the 'Gussi' logo and a or black polyurethane version with a plain centre. It is our recommendation that leather wheels are fitted internally only.

The Gussi range of wheels come as standard with a 3/4" tapered key way fitting which is a very common wheel specification and should fit the majority of steering shafts. On request we are able to supply with a splined shaft (longer lead times may apply). We are able to adapt and change the finish to suit your requirements but please note that sometimes we do need a minimum order quantity to be able to make certain changes.
