Short Description

A marine-grade mortise door latch with anti-rattle feature. This door latch is ideal for use as a simple latch, it does not have a locking feature.

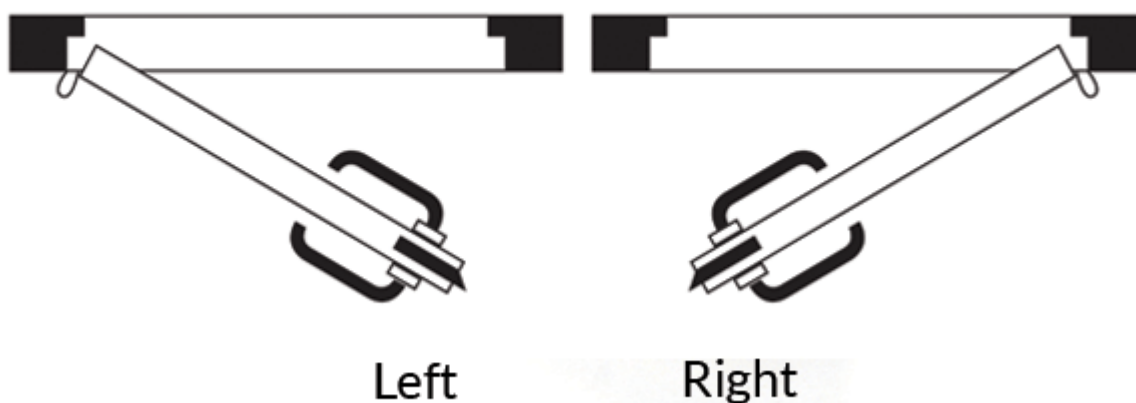

This latch is available in brass or stainless steel and is supplied complete with a matching striker plate. Please ensure that the correct door handing is selected for left or right handed use. Please refer to our door handing diagram below.

The lock contains an internal handle righting spring which will help to return the door handle to a horizontal position after use. For very heavy handles, it is recommended that an additional handle rose spring be used in conjunction with this latch.
