- Remote control and control panel for cockpit control

## Description

---

'Miss' is a versatile product with completely automatic hydraulic movement.

'Miss' has been designed to meet the traditional needs of a wide and varied class of boats. The passerelle features a clever aesthetic stainless steel cladding which is available in both polished and painted finishes. The core structure of the passerelle is however made from aluminium which offers excellent strength but crucially lightness.

Solidity and lightness go hand in hand.

'Miss' offers an excellent choice of walkway material: from the classic teak or iroko grating to the modern technologies of Rope Deck with a 100% polyester monofilament cord cover. The whole series is equipped with an infrared [standard] or radio wave remote control for maximum functionality.

## Additional Information

---

Mounting Width	410.00
First Stage Width (mm)	360.00
Second Stage Width (mm)	327.00
Ram to Pivot Distance (mm)	230.00

## Product Options

---

Maximum Extension (mm):	2250.00
	2500.00
	2900.00
