

PI 489 TURNING ERA

Product Images

Short Description

- Telescopic and rotating gangway with automatic functions for telescoping and elevation
- Gangway and crane function to lift a tender
- Structure made in polished stainless steel
- Grating boardwalk made in iroko
- Rotating base for deck mounting
- Automatic rope handrail
- Manual pump for emergency
- Remote and touchpad panel remote control to operate from the cockpit

Description

In the wide range of Besenconi products, an important position is occupied by the rotating telescopic retractable passerelle. The framework of the gangways is built of powder coated or polished stainless steel while the structure of the storage box is made of light alloy. The hydraulic movement guarantees precision and fluidity. All the movements are automatic and the remote control works exclusively by infrared, for maximum safety and functionality. Some models in the range involve both movements of elevation and rotation and are designed to be used also as tender or jet ski hauling and launching davits.

Additional Information

Mounting Width	532.00
First Stage Width (mm)	450.00
Second Stage Width (mm)	320.00
Base Diameter (mm)	310.00
Ram to Pivot Distance (mm)	270.00
Rotation Angle	180°
Lifting Capacity at Maximum Extension (kg)	200.00

Product Options

Maximum Extension (mm):	2775.00
	3265.00
