

SP 490

Product Images

Short Description

- Automatic rotating ladder combined with gangway function
- Structure made in powder coated stainless steel
- Housing integrated on the aft section of the yacht
- Self-levelling steps made in teak
- Lighting system and wi-fi ringbell
- Safety hydraulic pinlock
- One row of manual removable stanchions with rigid handrails and lifeline
- Combined with electro hydraulic control unit
- Option extra: possibility to customized dimensions and finishing

Description

Ladders with hybrid function, both bathing ladder and gangway, are able to combine efficiently the features of a gangway and of a ramp. It is possible to quickly convert the ladder into a gangway, by changing the step inclination, extension and height. This model of ladder was created to ensure the safety of the walkway at steep inclines and to facilitate disembarking. Customisations of this type of product are varied and typically required for most installations. The technical properties, such as size, tilt, rotation, as well as the finish of course, can be modified according to the specific demands of the shipyard, owner or designer to fit and mix the different technical and aesthetic requirements.

Additional Information

Weight (kg)	1650.000000
Maximum Extension (mm)	7115.00
Walkway Width (mm)	635.00
Pivot Distance (mm)	4050.00
Rotation Angle	± 30°
Lower Angle	35°
Raise Angle	20°
Cassette Length (mm)	6390.00
Cassette Height (mm)	380.00
Cassette Width (mm)	1470.00
Total Steps	10
