Description

The discretion and respect of the lines of the hull are guaranteed by Besenzoni with this solution of the walkway in two or three stages: it allows to achieve important measures so they are also suitable for large yachts. With this solution, the gangway "invites" guests on board, illuminating the walkway through the use of a courtesy LED where required and facilitating the walking with manual or automatic stanchions that allow an easy entry. The whole passerelle has contained in an housing box that well integrates with the yacht space. Design Center Besenzoni studies and designers these kind of yacht components in cooperation with the designers and shipyards to find the best solutions based on the different requirements.
