

BUC Besenzoni Unit Control for Passerelles

From

£1,010.78

Excl. Tax: £842.32

Product Images

Short Description

Besenzoni's *BUC* system allows the complete control of a Besenzoni hydraulic passerelle using your smart phone. Having installed the *BUC* bluetooth unit, simply download the free Besenzoni *BUC* app and leave your remote control behind!

Up to 8 devices can be connected to the *BUC* system which offers great flexibility as every boat user can have control of the passerelle in order to safely board and disembark the vessel.

Please ensure that you carefully check the ECU code of your passerelle before buying *BUC* in order to ensure that you correctly select the right *BUC* type:

CT6A4 - CT6A8: These ECU's require the BUC WHITE Besenzoni Control Unit (7FF99620)

RSP-: These ECU's require the BUC BLACK Besenzoni Control Unit (7FF99617)

Description

Apps, or mobile applications, are useful and efficient tools that have become part of our everyday life so Besenzoni have come up with an App especially for clients of their passerelles. It is now even easier for boat owners to board their vessel when they arrive at the dock, even if they have forgotten the remote control for the gangway. A free, innovative App **Besenzoni Control Device** - for use on IOS 10.0 devices or higher and Android 7.0 or higher - which, combined with a receiver/adaptor **Besenzoni Unit Control**, enables you to operate the Besenzoni gangway (both the retractable and the external types) installed on your boat.

STEP 01:

DOWNLOAD APP

Download free App Besenzoni Control Device available for mobile devices with an operating system IOS 10.0 devices or higher and Android 7.0 or higher.

STEP 02:

BUY BUC

After carefully checking the technical data of your gangway, purchase the correct Besenzoni Unit Control receiver / adapter for your passerelle here online at timage.co.uk.

STEP 03:

INSTALL BUC

Before proceeding with the positioning, installation and commissioning of the device, carefully read the installation and operating instructions.

STEP 04:

USE BUC

Using BUC to move your Besenzoni gangway is simple and intuitive. The App can be connected simultaneously with up to 8 devices.
