Short Description

A table or floor mounted reading light with a difference. The Vega TI can be supplied in three different lengths to suit either a table top installation, a ledge or lower top installation where a longer flex is required or a floor mounted installation. The reading light is made entirely from brass and the flexible stem is upholstered in a choice of three different shades of leather. The leather is hand stitched and features an attractive stitch detail running along the entire leather seam.

The luminaire features a neutral white 3500°K LED module with a powerful 214 Lumen output and narrow beam. This results in a measured 265 Lux at 1m distance from just a 3 Watt LED source.

- Offered in three lengths as well as three different leather finishes
- Marine-grade construction with chrome plating

- Efficient LED module with 3500°K white output
- 10-30Vdc input
- Dimmable
